Introduction and a Word of Thanks

We are now in our 49th year of service to the Canadian Industrial Safety Market.

This catalogue has been designed for ease of use and simplicity.

We provide many services beyond the scope of this catalogue and we invite your inquiries on any application in the industrial textile field.

Our mission is to provide quality products at competitive prices with prompt and courteous service.

Thank you for your confidence in our products and our company.

AGO INDUSTRIES INC.

General Terms and Conditions

1. All products and prices are quoted FOB our London, ON manufacturing facility.
2. All taxes are extra, if applicable.
3. Our terms are Net 30 Days OAC, or we accept VISA, MC and AMEX.

**Note - Height & Width shown is of each Panel Curtain. Other Frame Sizes Available - Casters are an optional extra.*

AGO PORTABLE SAFETY SCREENS

The AGO portable lightweight frame is constructed of plated, corrosion resistant, heavy duty tubular steel consisting of slip joint design with easy press spring locks for simple and adjustable assembly. Support legs are adjustable spring lock design that allows the legs to be folded parallel to screen for compact storage. Sturdy plated hinges permit easy folding for compact storage and handling on two, three and four panel models. Heavy duty plated frame hooks secure curtains to frames. Heavy duty casters are available as an optional extra on all models.

AGO Curtain Fabrics are chosen to best suit job application.

FR FLEXIBLE SEE/THRU VINYL CURTAINS

The yellow, orange, blue, combo yellow/green, green, and shade 8 vinyls exceed OSHA specifications for screening or enclosing Stick, MIG and TIG welding operations. Clear 'See Thru' vinyl allows 100% visibility for screening where welding flash does not exist. THESE 'SEE THRU' CURTAINS - ISOLATE WELDING AREAS - PROTECT ADJACENT WORKERS - INCREASE PRODUCTION WHEN WORK CAN BE SEEN IN PROGRESS - PROVIDE SAFETY AND IMMEDIATE ATTENTION FOR INJURED WORKERS. THE HEAVY DUTY YELLOW, ORANGE, BLUE, COMBO YELLOW/GREEN, GREEN AND SHADE 8 TRANSPARENT VINYL FABRICS CONTAIN A SPECIAL FORMULATION WHICH ABSORBS DANGEROUS ULTRA-VIOLET RADIATION AND PROTECTS CO-WORKERS FROM EYE FLASH BURNS.

The specially treated vinyl curtains meet all requirements of the California State Fire Marshal and the CPAI for flame resistance. All vinyl curtains are fabricated with electronically welded seams and hems for greater strength and life expectancy. Vinyl grommets are electronically sealed into double hems on 12" centers, allowing the grommet to become an integral part of the curtain.

FR FLEXIBLE NON SEE/THRU CURTAINS

Opaque safety screen curtains are offered in a number of fabrics chosen for particular conditions - such as heavy abrasion, moisture, high-temperature, etc. These curtains include ambient temperature fabrics - cotton duck, vinyl coated polyester and neoprene coated nylon, and higher temperature fabrics including Fibreglass cloths, both coated and uncoated, and a variety of aramid cloths.

These opaque curtains have sewn seams and hems. Threads are selected to be compatible with the curtain fabrics. Metal grommets are installed in the hems on 12" centers.

Safety Curtains

Combo 'See Thru' Vinyl

See Fabric # 006

Description

14 mil PVC Vinyl sheeting, flame resistant, meeting requirements of CPAI-84, and California Fire Marshall's Registration # F191. These transparent Vinyl Safety Curtains exceed OSHA specifications for screening Stick, Mig and Tig Welding operations. This material has been specifically formulated to absorb dangerous ultraviolet radiation to prevent personnel from eye flash burns.

Sizes

Curtains are fabricated to any size with electronically sealed seams and hems on all four sides. Vinyl grommets can be installed on the top side on 12" centers or on all four sides on 12" centers.

Ordering Information

Curtains can be ordered to any size. Specify fabric #, height x width and grommet location when ordering. Standard sizes are listed below with their respective item numbers.

Pricing

Custom curtains with grommets on top only \$ 1.85 per square foot
Custom curtains with grommets on four sides \$ 2.00 per square foot
Minimum curtain charge \$20.00 per curtain

Safety Curtains

13oz Translucent Reinforced Vinyl-Poly

See Fabric # 050

Description

A high quality tear resistant and flame resistant fabric well suited for outdoor use with superior low temp performance and UV resistance for long life. The vinyl coating provides a good shedding feature and a surface that can be easily cleaned. This fabric is resistant to water, grease, oil, most chemicals and mildew.

Sizes

Curtains are fabricated to any size with electronically sealed seams and hems on all four sides. Brass grommets can be installed on the top side on 12" centers or on all four sides on 12" centers.

Ordering Information

Curtains can be ordered to any size. Specify fabric #, height x width, grommet location, and colour when ordering. Standard sizes are listed below with their respective item numbers.

Pricing

Custom curtains with grommets on top only \$ 1.75 per square foot
Custom curtains with grommets on four sides \$ 1.90 per square foot

Safety Curtains

19oz Neony

See Fabric # 015

Description

Neony is a heavy duty black neoprene coated nylon fabric designed for tough, ambient temperatures applications. This fabric is highly resistant to punctures, tearing, abrasion, flame, sparks and most acids, as well as cold weather. Ideal as indoor or outdoor tarps and covers and general shop curtains.

Sizes

Curtains are fabricated to any size with stitched seams and hems. Brass grommets can be installed on the top side on 12" centers or on all four sides on 12" centers.

Ordering Information

Curtains and covers can be ordered to any size. Specify fabric #, height x width and grommet location when ordering.

Pricing

Custom curtains with grommets on top only \$ 5.65 per square foot
Custom curtains with grommets on four sides \$ 5.90 per square foot

40oz Neony

See Fabric # 016

Safety Blankets

22oz Goldengard

See Fabric # 017

Description

Designed as a general purpose safety fabric, this glass cloth is slightly rubberized to prevent absorption of oils and such in a shop environment. The light neoprene coating also enhances abrasion resistance, and it's economical price makes it a popular replacement for conventional asbestos. With a service temperature to 1000° F, typical applications are heat curtains, spray shields and light to medium duty welding blankets.

Fabrication

Blankets fabricated to any size with stitched seams and hems, using high temperature aramid thread.

Sizes

Blankets can be ordered to any size. Specify fabric # and height x width. Standard sizes are listed below with their respective item numbers.

Safety Blankets

22oz Aramid

See Fabric # 019

Description

An aramid blend heat resistant fabric that is extra tough, extra flexible and extra clean. It has superior abrasion resistance, high tear strength and excellent dimensional stability. It is a non-itching, non-irritating fabric that is particularly good as a high temperature cloth that requires constant handling. Aramid offers an excellent resistance to acids and alkalis, will not deteriorate with age and will not mildew. With a service temperature to 650° F, typical applications are heat pads, wear apparel, fire blankets and curtains.

Fabrication

Blankets fabricated to any size with stitched seams and hems, using high temperature aramid thread.

Sizes

Blankets can be ordered to any size. Specify fabric # and height x width. Standard sizes are listed below with their respective item numbers.

Safety Blankets

23oz Weldflex

See Fabric # 020

Description

Weldflex is a specially coated cloth made from a combination of aramid and glass fibres and treated to enhance the shedding of molten metal splash generated by the most severe welding or furnace operations. Weldflex is highly abrasion resistant, has exceptional strength and durability, good heat resistance, yet is soft, pliable and non-irritating. Weldflex sheds welding spatter and molten metal up to 3000° F on a 15° to 20° incline. With a service temperature to 650° F, Weldflex makes an excellent welding blanket or spray shield.

Fabrication

Blankets fabricated to any size with stitched seams and hems, using high temperature aramid thread.

Safety Blankets

16oz Carbon Felt

See Fabric # 021

Description

Carbon Felt is made from organic carbon fibre and is designed to provide protection in high temperature applications such as brazing, soldering and light welding. Carbon Felt is highly flame, heat and chemical resistant. It is non-flammable, non-melting and non-shrinking. It is amazingly soft, lightweight and flexible which allows it to be wrapped around pipes, stuffed into tight spots, or draped over objects that need to be protected from sparks, heat or flame. Carbon Felt withstands continuous temperatures up to 1800° F and short duration temperatures up to 2500° F with minimal heat transfer taking place between the blanket and the protected surface. Carbon Felt is ideal for autobody, plumbing and light welding applications.

The Carbon Felt AGO Torch Shield (shown below) is ideal for protecting walls, joists, and wall studs from burn damage associated with soldering. Torch Shield is a must for every tool box.

Fabrication

Blankets fabricated to any size with stitched seams using high temperature aramid thread. No hems are required as this material does not fray. Grommets are not suitable in this fabric.

Sizes

Blankets can be ordered to any size. Specify fabric # and height x width. Standard sizes are listed below with their respective item numbers.

Safety Curtains

17oz Heatstop

See Fabric # 022

Description

A silicone impregnated glass cloth designed to handle severe conditions in the industrial work place. The special non-combustible silicone rubber provides greater life and improved resistance to abrasion, flexing, tear and puncture. This material passes all tests for intoxicating fumes, meets federal standards and OSHA specifications. The silicone coating sheds molten metal splash and will not absorb oils, grease or water. With an operating temperature to 500° F, Heatstop is excellent for vertical spray and splash shield applications.

Fabrication

Curtains fabricated to any size with stitched seams and hems on all four sides, using high temperature aramid thread.

Sizes

Curtains can be ordered to any size. Specify fabric #, height x width and grommet location when ordering.

Pricing

Custom curtains with grommets top only \$ 5.00 per square foot
Custom curtains with grommets four sides \$ 5.25 per square foot

32oz Heatstop

See Fabric # 023

Safety Blankets

18oz Agotex # 600

See Fabric # 024

Description

Agotex is a soft, flexible cloth woven from a highly texturized form of fibreglass with higher temperature capability and better molten metal splash resistance. Agotex withstands continuous temperatures up to 1100° F and higher short duration temperatures and withstands cold to -100° F. Agotex has high dielectric strength and resists most acids, alkalis and solvents. A very strong fabric with good insulating properties, Agotex is an excellent alternative to conventional asbestos for welding, drop, fire and oven curtains, stress relieving blankets, thermal insulation, welding and safety blankets and industrial insulations. Colour is safety red.

Fabrication

Blankets can be fabricated to any size with stitched seams and hems on all four sides, using high temperature aramid thread. Optional brass grommets can be installed on custom blankets if required.

Sizes

Blankets can be ordered to any size. Specify fabric # and height x width when ordering. Standard blanket sizes are listed below with their respective item numbers.

Safety Blankets

24oz Agotex # 800

See Fabric # 025

Description

Agotex is a soft, flexible cloth woven from a highly texturized form of fibreglass with higher temperature capability and better molten metal splash resistance. Agotex withstands continuous temperatures up to 1100° F and higher short duration temperatures and withstands cold to -100° F. Agotex has high dielectric strength and resists most acids, alkalis and solvents. A very strong fabric with good insulating properties, Agotex is an excellent alternative to conventional asbestos for welding, drop, fire and oven curtains, stress relieving blankets, thermal insulation, welding and safety blankets and industrial insulations. Colour is safety orange.

Fabrication

Blankets can be fabricated to any size with stitched seams and hems on all four sides, using high temperature aramid thread. Optional brass grommets can be installed on custom blankets if required.

Sizes

Blankets can be ordered to any size. Specify fabric # and height x width when ordering. Standard blanket sizes are listed below with their respective item numbers.

Pricing

Custom Blankets \$ 5.55 per square foot

Safety Blankets

31oz Agotex Plus # 1000-P

See Fabric # 030

Description

Agotex is a flexible cloth woven from a highly texturized form of fibreglass then treated with a patented vermiculite coating which enhances it's resistance to high temperatures and molten metal splash. The vermiculite coating makes this fabric suitable for molten metal splash protection as it is able to dissipate heat radically across the fabric so as not to allow it to concentrate in one spot. Agotex Plus has very good insulating properties and is an excellent choice for welding and splash blankets. Service to 1500° F and higher intermittent temperatures.

Fabrication

Blankets can be fabricated to any size with stitched seams and hems on all four sides, using high temperature aramid thread. Optional brass grommets can be installed on custom blankets if required.

Sizes

Blankets can be ordered to any size. Specify fabric # and height x width when ordering. Standard blanket sizes are listed below with their respective item numbers.

Safety Blankets

Ago-Sil # 1800

See Fabric # 034

Description

Ago-Sil is a highly texturized silica cloth made of a minimum 96% amorphous silicon dioxide. A special proprietary treatment reduces dusting and improves handling and abrasion resistance. Ago-Sil has a melt temperature exceeding 3100° F. It provides sustained protection against high heat conditions and is highly resistant to molten metal splash. Ago-Sil has superior thermal insulating properties enhanced by a high moisture absorption capacity which adds to its insulation capabilities without degradation of properties. It has a rapid heat dissipation factor and a very low thermal conductivity. Ago-Sil offers excellent electrical resistance. As well, it has excellent resistance to and compatibility with most chemicals. Ago-Sil is very flexible with excellent drapability and offers a wide versatility of use in industry with a service temperature to 2000° F. Applications include drop curtains for 'hot work' such as welding and burning, thermal and electrical insulation, stress relieving and curtains in front of furnace and oven openings. A host of miscellaneous jobs such as tray covers, pipe lagging, belting and sleeves, etc., can be handled by this high temperature cloth.

Fabrication

Blankets can be fabricated to any size with stitched seams and hems on all four sides, using high temperature aramid thread. Optional brass grommets can be installed on custom blankets if required.

Sizes

Blankets can be ordered to any size. Specify fabric #, height x width (and grommet location if required) when ordering. Standard blanket sizes are listed below with their respective item numbers.

Safety Curtains

Aluminized Aramid

See Fabric # 038

Description

This fabric is made from a blend of Aramid and Glass fibres. A vacuum metallized dual mirror finished aluminized Mylar film is bonded to one side of the fabric. This fabric is intended for radiant heat reflectivity and will withstand molten metal splash to 3000° F. The mylared aluminium fabric does not delaminate and is very soft and flexible. This fabric is intended for radiant heat and molten metal splash curtains and apparel.

Fabrication

Curtains can be fabricated to any size with stitched seams and hems on all four sides using high temperature aramid thread. Optional brass grommets can be installed on curtains if required.

Sizes

Curtains can be ordered to any size. Specify fabric #, height x width (and grommet location if required) when ordering.

Pricing

Custom Curtains with grommets on top only \$ 15.75 per square foot
Custom Curtains with grommets on four sides \$ 15.95 per square foot

Aluminized Aramid/Carbon

See Fabric # 039

Description

This fabric is made from a blend of Aramid and Carbon fibres. A vacuum metallized dual mirror finished aluminized Mylar film is bonded to one side of the fabric. This fabric is intended for radiant heat reflectivity and will withstand molten metal splash to 3000° F. The mylared aluminium fabric does not delaminate and is very soft and flexible. This fabric is intended for radiant heat and molten metal splash curtains and apparel.

Fabrication

Curtains can be fabricated to any size with stitched seams and hems on all four sides using high temperature aramid thread. Optional brass grommets can be installed on curtains if required.

Sizes

Curtains can be ordered to any size. Specify fabric #, height x width (and grommet location if required) when ordering.

Pricing

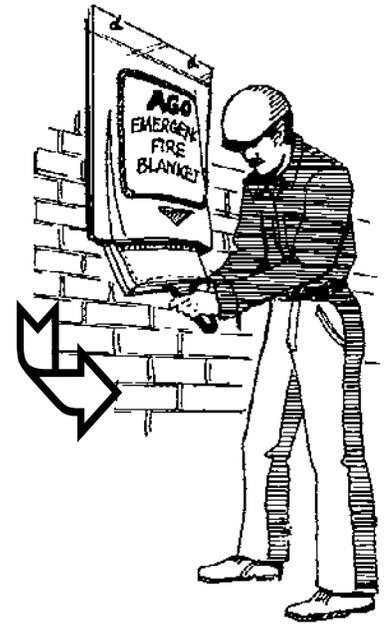

Custom Curtains with grommets on top only \$ 17.00 per square foot
Custom Curtains with grommets on four sides \$ 17.20 per square foot

EMERGENCY FIRE BLANKETS

6' x 5' Agotex # 600 (see fabric # 024) fibreglass blanket comes fan-folded into a Hi-Vis vinyl pouch ready for wall mounting.

Easy To Use:

1. Remove fire blanket from pouch by pulling downward on the exposed tab with a firm deliberate motion.
2. Open blanket to full size by quickly flipping the folded blanket
3. Drape the blanket over the flaming object in such a manner as to seal off the air and smother the fire.

Wall Mount Emergency Fire Blankets

Agotex #600

See Fabric # 024

Description

This Ago Emergency Fire Blanket is fabricated from Agotex # 600 - 18oz glass cloth. It is flexible and it will conform to the contour of the object being covered, so that a total smothering effect can be obtained. This fabric will withstand temperatures to 1000° F. The blanket is packaged in a specially designed "Quick Release" wall mount pouch. The pouch is fabricated from a heavy vinyl coated nylon in a safety yellow colour denoting the contents. The pouch opening is by means of hook and loop fastener that allows quick and easy removal of the blanket in one motion. Two grommets are installed to allow the pouch to be hung on the wall.

Pricing

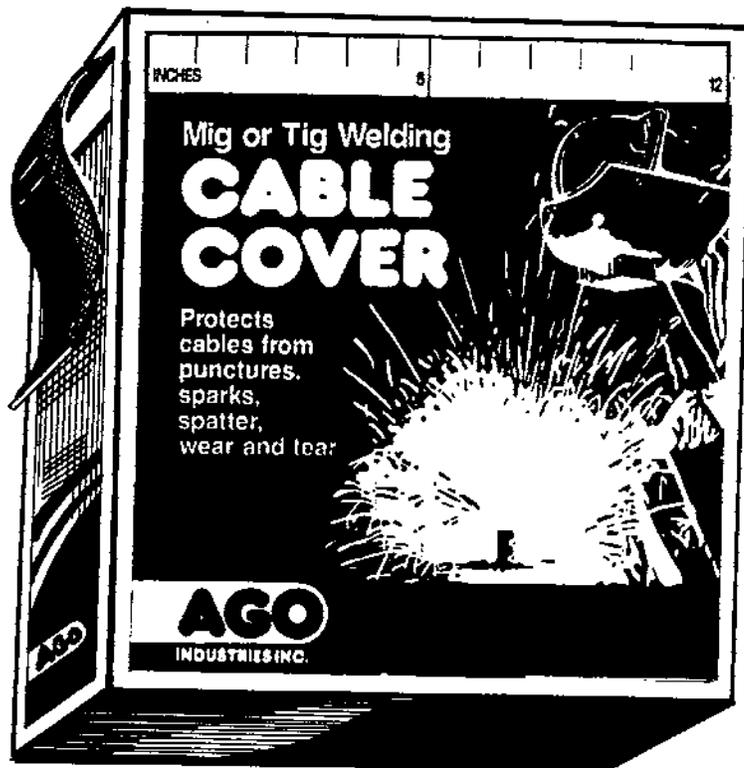

SP-032	5' x 6' Agotex # 600, with Wall Pouch	\$129.90
SP-000	Pouch Only.....	\$ 15.75

Note: This blanket is intended to be used as an Emergency Fire Blanket to smother flames. It is resistant to sparks and light splatter from welding operations, however, fabrics #17 through #35 are more suited for medium to heavy duty welding blankets.

MIG AND TIG

CABLE COVER

Fabricated from flame resistant 19oz neoprene coated nylon with continuous hook and loop fastener.

Highly resistant to:

- ABRASION
- PUNCTURES
- SPARKS
- SPATTER
- WEAR AND TEAR

Sizes:

CG-008-TIG 4.25" wide

CG-008-MIG 5.25' wide

Other sizes available upon request

Packed in 100' dispenser box, cable cover can be cut to any length.

Welding Cable Cover

CG-008 MIG-TIG

See Fabric # 047

Description

AGO # CG-008 Welding Cable Cover is inexpensive protection for costly feed and power cables. The 19 oz. neoprene coated nylon fabric is highly resistant to abrasion, tearing and puncture. This flame resistant ambient temperature material allows most welding sparks to fall or bounce off preventing burn-through. The continual Hook & Loop fabric fastener provides a complete sealing of the cover that tends to eliminate snagging of the cable when passing over protruding objects and allows a dust and a dirt-free inside environment for the cables. There is no zipper to be welded closed by weld slag or dirt, and no snaps to allow snagging on protruding objects over which the cable is pulled. When cable repairs are necessary the Hook & Loop closure allows a Quick-Sure opening and may be used again either in its full or partial lengths. CG-008 Cable Cover comes conveniently packed in a Pull-Thru dispensing box that contains 100 Lineal Feet of cover, either MIG or TIG. A measuring scale is printed on the box that allows the required length of cover to be pulled out of the box and the box has a chart on which to record the remaining length of cover within the box. The box provides good storage and control of the Cable Cover.

Aluminized Garments

Aluminized Preox®

See Fabric # 037

Description

The base fabric is Preox® Carbon. A vacuum metallized dual mirror finished aluminized mylar film is bonded to one side. This fabric is intended for reflecting radiant heat and shedding molten metal splash up to 3000° F.

Item #	Style	Description	Price
AL-805	Jacket	30" length with snap closure and inside pocket • Sizes: S, M, L, XL, 2XL, 3XL • Sizes XL and up add 10% to price	\$ 492.15
