*Workwear that works!*TM

At AGO, your comfort and safety is our priority.

Since 1982, AGO Industries Inc. has been developing and manufacturing a line of highly visible Workwear.

AGO uses International Visual Orange fabrics, the colour prescribed by the various regulating bodies of the safety industry. Another integral part of these garments is the retroreflective fluorescent yellow and silver tapes. The fluorescent yellow stripes on front and X on back, and silver band on arms and legs provides high visibility in both daytime and night-time conditions.

Our garments are constructed to be rugged by a highly skilled work force in our state of the art manufacturing facility, located in London, ON Canada using the most efficient, high-tech, computer assisted equipment resulting in superior product, quality and service.

Hot weather, cold weather, wet weather, day or night, AGO Workwear has your comfort and safety in mind. We offer the most complete line of garments for year round conditions.

From coast to coast, AGO's Traffic Safety Workwear is accepted and used by Hydro and Utilities Commissions, Municipal Works Departments, Telecoms, Road Crews and Railroads.

Anywhere workplace safety demands high worker visibility, you'll find AGO Workwear at work.

- Meets Ontario OHSA requirement for night work

Sizing: One size fits all

The Need for Hi-Visibility Traffic Safety Apparel

Moving machinery and vehicles on roadways and construction sites can be hazardous and workers in these environments need to be highly visible. AGO Hi-Visibility Traffic Safety Apparel makes workers more visible at greater distances. The bright orange colour of our garments contrasts with background environments and yellow retroreflective tape adds further contrast with a distinguishable pattern of stripes on the front and X on the back. Night-time visibility is further enhanced with silver retroreflective tape on arms and legs. Our 100% cotton line of Hi-Visibility Traffic Safety Apparel is rugged, functional and comfortable to wear.

About AGO

AGO INDUSTRIES INC. has been manufacturing Hi-Visibility apparel for over 40 years. Our state of the art manufacturing facility, located in London, ON Canada, employs a highly skilled work force and uses the most efficient, high-tech, computer assisted equipment resulting in superior product, quality and service.

F Y I

Ontario OHSA Regulation 213/91

Sec 69.1 (1) A worker who may be endangered by vehicular traffic shall wear a garment that covers at least his or her upper body and has the following features:

1. The garment shall be fluorescent blaze or international orange in colour.
2. On the front and the back, there shall be two yellow stripes that are 5 centimetres wide. The yellow area shall total at least 500 square centimetres on the front and at least 570 square centimetres on the back.
3. On the front, the stripes shall be arranged vertically and centred and shall be approximately 225 millimetres apart, measured from the centre of each stripe. On the back, they shall be arranged in a diagonal "X" pattern.
4. The stripes shall be retroreflective and fluorescent.

Sec 69.1 (4) In addition, a worker who may be endangered by vehicular traffic during night-time hours shall wear retroreflective silver stripes encircling each arm and leg, or equivalent side visibility-enhancing stripes with a minimum area of 50 square centimetres per arm and per leg.
